Invoxia disrupts desktop telephony

Invoxia disrupts desktop telephony

Following the [Best of CES Innovations award](#) and the multiple worlds awards ([Red Dot 2012](#), [Observateur du Design 2013](#), [Telephony product of the Year 2012](#)), celebrating the new telecommunications vision, invoxia is now a service provider and unveiling brand new features this year **for both the NVX 610 and AudiOffice devices**.

NVX 610: Now available with an integrated SIP telephone line

The NVX 610, developed by invoxia is revolutionising the entire concept of telephony services for small businesses and home offices. At CES 2013 invoxia is launching the first plug and play professional phone which will now be sold with an integrated phone number/ SIP line. There is no need for users to search for another provider to supply the telephone line, everything is now included and set-up is incredibly easy.

“Plug & call”

Invoxia is now a service provider because the New NVX 610 is sold with an integrated telephone line. The user simply plugs in the phone, connects it to an iPhone, gives his email address and a telephone number is directly given. Competitive subscriptions are available. The subscription will be paid on a dedicated webpage and installation takes less than 3 minutes to set up.

High-quality sound and performance

An advantage of invoxia's In Vivo Acoustics technology is that it enables users to hold conference calls, listen to music and benefit from very high sound quality. With In Vivo Acoustics the separation between the left and right channels is very impressive. The New NVX 610 comes with 6 speakers and 4 microphones for the best quality sound. The sound coming from the speakers is hardly noticeable. It is possible to enjoy an immersive listening experience wherever the person is situated in the room because each instrument is spatially isolated and can be heard very distinctly. The New AudiOffice is now also designed with a new passive radiator which increases the performance of base sounds and gives a higher quality of sound when using the speaker.

Award winning design

Invoxia have been awarded TMCnet 2012 Internet Telephony Product of the Year for the NVX 610. Invoxia have adapted the design for the new version of the NVX 610 which will have handset without the screen on the back.

Simple connectivity

The New NVX 610 now comes with 2 USB master ports which enable users to connect the handset and to charge an iPad. It comes with USB cables taking into account the Apple products evolution with the Lightning connector; the device is now perfectly integrating the iPhone 5.

Availability

The New NVX 610 will be first available in France at the beginning of 2013, then in the US and Europe during Q1. The New NVX 610 can be purchased from www.invoxia.com at 417 € or 599 \$ (excl. tax) - invoxia is designed for all iOS devices including the iPhone 5.

The New AudiOffice: Now fully adapted for the iOS and Android devices and with a range of brand new features

The AudiOffice is a versatile dock with a sophisticated Cortex A8 processor which optimizes iOS and now Android devices to such a level that it is an essential device for seamless daily communication and also for listening to music. An updated version, the 'New AudiOffice' will have a range of brand new features will be available in Europe and the US and will be unveiled at CES 2013 for the first time.

Now compatible with Android as well as iOS devices

The AudiOffice is already compatible with all iOS devices including the iPhone 5 and is now fully compatible with Android 4 and above. invoxia constantly adapt and update their devices according to shifts in the market. Gartner estimates that '56% of Smartphones purchased by businesses in North America and Europe will be Android devices in 2016.

Connecting the AudiOffice to both Smartphones and tablets is easier than ever. Simply pair the AudiOffice to an Android or iOS device via Bluetooth and users can call using their mobile line or use any of the VOIP applications such as Skype, Viber, Bria or Facetime.

High quality sound

The New AudiOffice now has six speakers instead of four and is enhanced by four inbuilt microphones which provide even higher sound quality. The AudiOffice is now also designed with a new passive radiator which increases the performance of base sounds and gives a higher quality of sound when on conference calls or listening to music.

The AudiOffice is already enhanced with invoxia's unique technology inVivo Acoustic technology and all invoxia products have been designed with HD sound in mind, as they already support HD sound for VOIP communications whilst also being enhanced with invoxia's unique InVivo Acoustic technology.

Easy connectivity

The New AudiOffice will be supplied with three USB cables (30 point USB cable, lightning cable, and a micro USB cable) and a master USB port.

Availability

The New AudiOffice will be available in the US and Europe during Q1 2013.

The New AudiOffice is available to purchase from www.invoxia.com priced at 299 US\$ or 299 € incl. VAT worldwide. It is also available to purchase in store from FNAC, France.
